Introduction Target group & Applications

G180 Introduction & Applications

The G180 is an important new member of the AGP concrete grinder product line. It is optimized to use 180mm cup wheels for faster progress on larger areas. Like our 125mm models, the G180 is purpose-built and designed for ideal concrete grinding performance while maintaining strict dust control. The variable constant speed function gives the tool excellent versatility. The constant speed electronics maintain the set speed, regardless of load, giving the smoothest possible finish. Since the offset height of cup wheels varies, we offer a pair of arbor spacers to compensate, as needed, for wheels with less offset. By using different types of diamond cup wheels, a vast array of different tasks can be done; from rough grinding and leveling, to stripping coatings, to surface preparation for applying coatings.

Target Groups

- Renovation Contractors
- New Construction Contractors
- Tilers and Floor Installers
- Stonemasons
- Specialists

Sales Arguments

2 Spring Suspension

3 Ergnomic Front Handle

4 Half-Moon Door

(5) Variable Constant Speed

d 🚯 Special Waterproof Switch

1 LED Indicator

LED Indicator for optimizing grinding efficiency with overload and overheat warning.

2 Spring Suspension

Outstanding dust control is achieved with the dust skirt with brush and spring suspension. It automatically compensates for irregular height surfaces, keeping the tool level to the work surface.

3 Ergnomic Front Handle

Adjustable ergonomic front handle allows clearance for edge grinding.

4 Half-Moon Door

Half-Moon Door for grinding up to the edge.The door and dust skirt brushes are fully replaceable.

(5) Variable Constant Speed

Speed can be adjusted to suit the task at hand. Once set, the speed is electronically stabilized to maintain the speed, regardless of load.

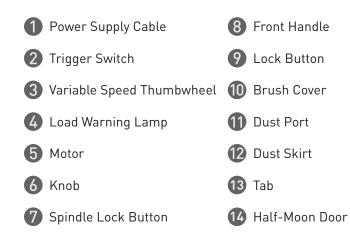

6 Special Waterproof Switch

Hall-Effect Switch is completely waterproof and dustproof. Includes anti-restart function.

Technical Specification

Model	G180			
Power Input	220-240 V : 2400 W			
	110-120 V : 2100 W			
Voltage, Frequency	220-240 V ~ 50-60 Hz			
	110-120 V ~ 50-60 Hz			
No Load Speed	3500 - 5800 min ⁻¹			
Wheel Diameter	180 mm (7")			
Spindle Thread	M14			
Arbor	22.23 mm (7/8")			
Dimensions	540 x 210 x 195 mm			
Weight	5.6 kg (12.3 lb)

Conclusion

The AGP is a purpose-designed concrete grinder, while the others are simply converted angle grinders. The AGP has many features which are missing on competitors' machines, like constant speed electronics, variable speed control, LED load indicator, current and thermal overload protection, and spring suspension. It is clearly the superior tool.
